Massachusetts: January 29th - 30th, 2019

System Brings Mix of Rain/Snow/Sleet on January 29th - 30th

A light snow/sleet mix developed over the area between 8 – 10 PM on January 29th with temperatures 34 – 37 degrees. As warm air moved in aloft, any mixed precipitation changed over to mostly rain towards Midnight, which continued into the pre-dawn hours on January 30th. Once the cold front moved in, rain ended as a brief period of light snow between 4 – 6 AM with temperatures quickly settling into the upper 20's to low 30's. These freezing temperatures then lead to some areas of black ice.

Zipcode	City	Type	Total	Ice	Notes
02122	Boston	Snow / Sleet	Scattered Coating	0.00"	
02127	Boston	Snow / Sleet	Scattered Coating	0.00"	
02132	Boston	Snow / Sleet	0.1"	0.00"
