Disturbance Brings Steady Light Snow on December 8-9

Start: 5:30 - 8:30 PM December 8th **End:** 1 - 4 AM December 9th

After a few non-accumulating flurries earlier in the afternoon, flurries gradually developed into periods of light snow (mixed with rain at times near the coast) between 5:30 - 8:30 PM December 8th with temperatures of 33-36 degrees. As the evening continued, any rain/snow mix changed to all light snow, which continued steadily into the night until tapering by 1 - 4 AM December 9th. Temperatures gradually fell to between 27-30 degrees by the end of the event.
